

HALIFAX

Casegoods & Tables

Halifax COLLECTION

Halifax represents a culmination of Tayco's steadfast commitment to always raising the bar through progressive design and providing the ultimate product experience.

Designed for functionality, this new private office collection is highly customizable to the user with dynamic configurations for tables, legs, storage and cabinets, as well as the opportunity to add personality with metal components available in 20 different colours.

The demand for adaptable office furniture continues to grow. Private offices are becoming more dynamic, shared in use, lighter in detail and with lower storage requirements. Incorporating adaptable furniture encourages productivity and flexibility, allowing offices to tailor spaces to individual preferences and business needs.

Halifax reimagines casegoods. Every element has been well considered to ensure optimal functionality and comfort, allowing us to evolve from the constraints of traditional casegoods to create a lighter feel and unique design you truly want to be part of the office.

HALIFAX

Casegoods REIMAGINED

Designed with high functionality, Tayco's Halifax Collection provides flexible solutions for any multi-purpose workspace.

Built for the every day, evolving office, this desking and tables line is warm, inviting and balanced, with touches of industrial flair throughout.

Features

Leg Options

- A-Leg
- V-Leg

Table Options

- Coffee Height - 14" H
- Seated Height - 29"
- Standing Height - 42" H
- Mobile - 29" H (A-Leg only)

Table Shapes

- Rectangular
- Super Ellipse
- Video
- Circle
- Square
- Squircle
- Trilobe

Unique Details

- Seamless Height-Adjustable Table integration
- Metal features available in 20 colours
- Private Office - all storage raised on 6" legs
- Mckay Handle (NEW)

**High Design.
High Function.
Highly Adaptable.**

Choose From Two Leg Options

A-Leg

- A-Leg features a removable infill, allowing for two-tone colours, as well as discreet wire management.

V-Leg

- Sleek and hollow inside with a V-like formation, the V-Leg comes with magnetic wire direct.

Best Foot FORWARD

The A and V legs that form the basis for the Halifax system offer two functional and visual approaches to supporting a tabletop, work surface or private desk.

Featuring a removable infill, the A-Leg is rectangular in shape, allowing for an inner cover with colour accents inside the leg and discrete wire management. The A-Leg is a great option for larger tabletops as it's design provides cleaner table-to-table linking and desk formats that maximize leg space under the desk between legs.

The V-Leg is designed to be used independently, without the need of beams or any other structures to stabilize it. It can be used anywhere and in different orientations: angled for standing height and parallel for seated. Being angled in two planes creates structural stability for the table, and tapering to the table top in a "V" shape creates a very strong connection to the top through a very logical form that looks as stable as it is. The "V" also creates an internal cavity for cable management.

A-Leg

Lee Fletcher

Lee Fletcher is an industrial designer and also a founding partner at Fig40. He received an MA in Industrial Design from Manchester Metropolitan University, and is inspired by the intersection of design, business and manufacturing. Whether it's creating new furniture systems or business equipment, his work has won numerous awards and accolades including a RedDot award in 2013 and the Best of Canada Design award.

FIG[40]

Terence Woodside

Terence Woodside is a founding partner of Fig40 studio. With a degree in Mechanical Engineering from Queen's University and experience in automotive and furniture manufacturing, he understands the nature of natural forces, what materials can do, and how they are shaped. In designing beautiful systems like Tayco's Halifax, his goal is to bring better products into the world through process and experience.

Reshaping Office DESIGN

“The Halifax Collection was a very engaging project to work on. Workplace design is in a state of flux with many interpretations of what a ‘private office’ even is and how they are used.

Our challenge was to design a product that can respond to the evolving and uncertain requirements of clients and designers while remaining relevant to more conventional applications, all the while with a product that can be made efficiently by Tayco at a competitive cost point.

Halifax is a system that reinterprets casegoods: It is flexible, with a clear identity and wide scope of application.”

Fig40 is a Toronto based industrial design studio driven to developing relevant, sustainable and award-winning products that inspire collaboration – collaboration between people, and collaboration between design and manufacturing. The outcome is a design that is not only engaging and relevant but also a solution for bringing people together in organic and deliberate ways.
